SecureFix Audit Report — example-good

Status: pipeline completed — no findings in declared scope

Finding severity aggregate: low (severity aggregate, not a risk rating) (not an enterprise risk rating)

Product: 0.2.0-phase1-alpha | Run: audit_ea2db29723debb69

Summary: All audit stages passed

Trust Summary

What you can trust:

- Result is bound to audit run audit_ea2db29723debb69 and schema 1.
- Code fingerprint of audited sources: sha256:88531c1ddb87...
- Findings come from the tool pipeline; operator may dismiss false positives separately.
- Technical rule profile: baseline (not a compliance certification) | product: 0.2.0-phase1-alpha

Out of scope for this audit:

- Infrastructure / network / cloud penetration testing.
- Runtime dynamic analysis / fuzzing.
- Secrets outside the submitted source tree (CI secrets, vaults).
- Certification (ISO/SOC2) or a guarantee of zero vulnerabilities.
